

POSITION VACANT

MAINTENANCE AND SUPPORT TECHNICIAN

Have you completed your apprenticeship as a fitter?

Interested in robotics and industrial automation equipment?

Would you like to take your skills to the next level?

An exciting opportunity exists to join Dexion Systems Services' growing business as a Maintenance and Support Technician, working in a highly automated facility.

As a Maintenance and Support Technician, the primary role will be to provide cost effective and superior quality services for the customer, by performing highly diversified duties to manage, troubleshoot, repair and maintain the efficient operation of the automation equipment supplied and installed onsite. All in accordance with safety, predictive and proactive maintenance processes and systems.

Customers will rely on the person in this role to restore system functionality. Knowing how to respond to this dependency, will see an applicant succeed in this role.

Ideally, the applicant shall possess the following:

- Trade background (Mechanical fitter)
- Some experience in a similar role
- Integrity and ability to maintain confidentiality
- Sense of organisation and planning, ability manage time well
- A level-headed approach to dealing with emergency situations and the ability to apply a practical hands-on approach when required
- Willingness to learn and develop new skills (automated and control systems)
- Training will be provided for:
 - First Aid Certificate
 - Working at Heights
 - Working Alone
 - Workplace Health & Safety policies and standards

General responsibilities:

- Perform duties to support and maintain Automation equipment
- Provide a timely response to emergency / unscheduled repairs (including breakdowns and malfunctions) of equipment during operation
- Perform scheduled maintenance repairs of equipment
- Perform machinist duties and responsibilities including, mechanical, pneumatic, hydraulic, troubleshooting and repair of equipment
- Read and interpret equipment manuals and work orders to perform required maintenance and service
- Update computerised maintenance management system (CMMS)
- Effectively plan materials management, including spare parts inventory
- Use a variety of hand and power tools, electric meters and material handling equipment in performing duties
- Comply with safety regulations and maintain clean and orderly work areas

What we offer:

- Opportunity to improve skills by working with automation equipment
- On the job training and development
- Opportunity to work with a growing Australian Owned company
- A supportive and team oriented working environment
- Competitive remuneration
